

Malware Analysis

Final Project

Weekly report 2: Network Configuration and Diagrams

Due: Nov 5, 2018

Requirements

You weekly report # 2 should include the following:

- Lab configuration overview: How do you plan to structure and configure your virtual lab?
- Selection of your virtual environment including virtual machines and its Operating Systems
- Which VM environment would you select? VMware ESXi or Virtual Box? Justify your selection
- Provide your Virtual lab network diagram including:
 - IP addresses
 - Access to Internet
 - Host machine configuration
 - Internal configuration for isolated virtual machines
 - Victim virtual machines
 - Virtual machine for analysis
 - Sniffer virtual machine
 - Secure folder for malware manipulation (If it is included in your network configuration)
